

Aggregates,  
Dashing Spars and  
Landscaping Supplies

# Border Aggregates

Border Aggregates Ltd are suppliers of natural aggregates and stone products to the landscaping and construction industry throughout the United Kingdom. Our customer base includes builders merchants, construction and civil engineering companies, DIY outlets, garden centres and landscapers. Our materials are selected from quarries in the United Kingdom and Europe and, wherever possible, local quarried aggregates are used that are specific to the area. This policy supports local business and reduces the environmental impact of transporting aggregates.

We pride ourselves on offering our customers a product matching service which covers existing and new projects with natural stone products to suit their requirements. Established for over 30 years the company has grown organically operating from two sites, plus four other group owned companies, giving national coverage using our own delivery fleet of modern tipper and flat back wagons. The company has worked to establish depots that stock vast ranges of stone. Decorative aggregates are available in bulk bags, medium bags and we can offer direct to site loads tipped loose.

Our continued investment in plant and machinery gives us unrivalled ability to supply bespoke specialised aggregate products in loose and bagged formats to suit all market sectors.

*All products shown in this brochure are shown when wet and the colour can be different when dry. All photos are representative of the product but no guarantees are given that products supplied will match exactly due to the natural colour variation of aggregates. We reserve the right to amend/replace or remove any product from the range without notice. All products are subject to availability. Printing processes can alter the natural colour of the aggregates shown and representative samples are available on request.*

## Decorative Aggregates

### Decorative Aggregates

Our decorative products are sourced mainly from the UK to reduce the environmental impact of transporting products over long distances. A selected range of aggregates sourced from Europe are used when there is no UK alternative.

These products look great used on their own or combined with other materials to create landscaping areas and pathways.

All of these products are available in **medium** and **bulk bags**, or **loose**. If the size or colour you are looking for is not shown, please get in touch.

**We can deliver any product loose or bagged to any location in the UK.**

Arctic Silver 3-8mm

Arctic White 3-8mm

Caledonian Harvest 3-8mm

Chatsworth Spar 3-8mm

## Spars & Dashing

Developed to suit architects, contractors and system designers looking for a specific finish that is packaged allowing contractors to maximise coverage.

We have also developed a range of iron free products that give peace of mind with a quality finish.

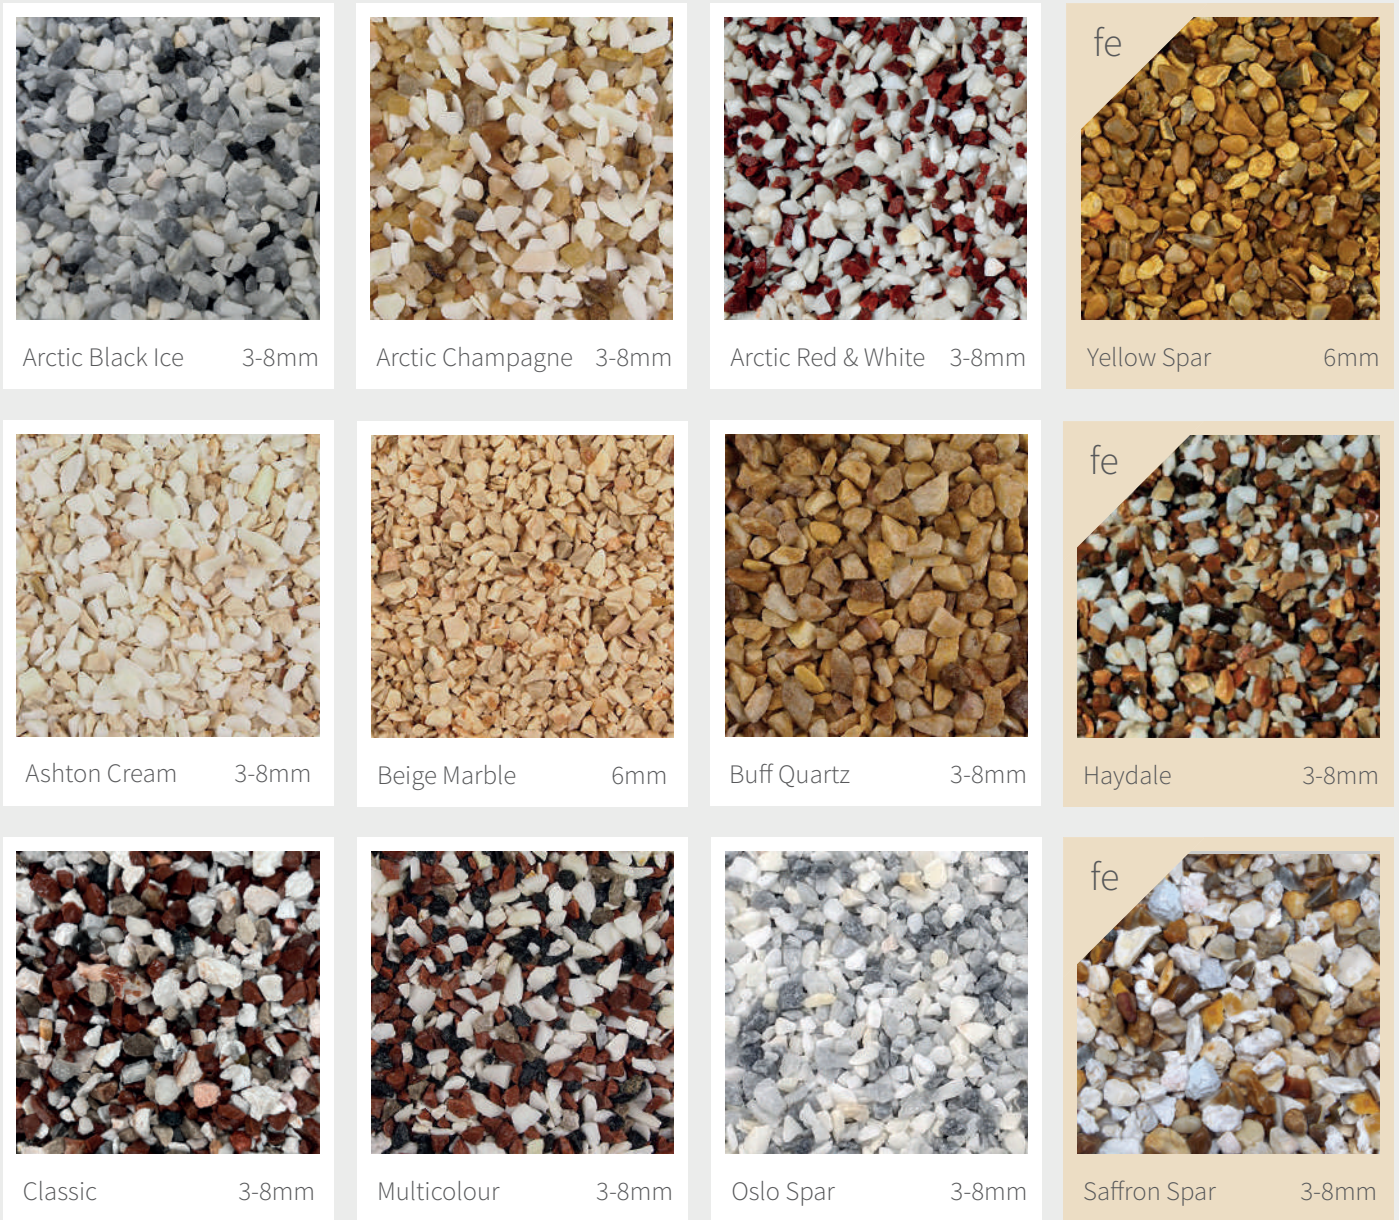

White Calcined Flint 3-8mm

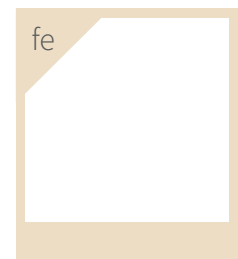

Yellow Cream Quartz 3-8mm

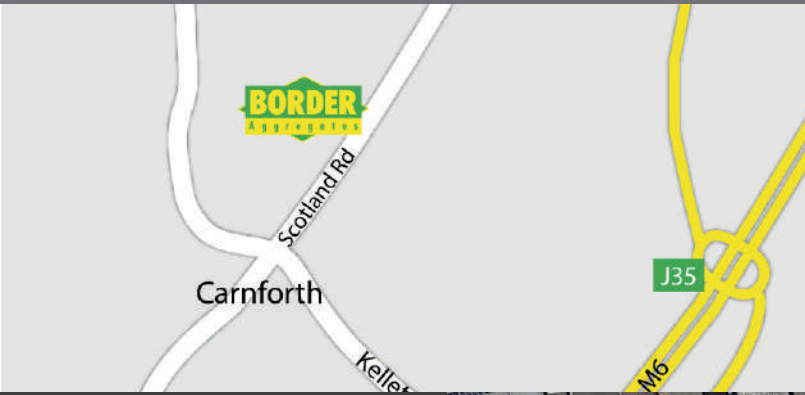

'Iron staining' is a completely natural occurrence that can affect some stones when exposed to the environment. Products that may contain iron traces are marked within a box like this.

Whilst iron staining can cosmetically change and alter the appearance of affected areas it has no detrimental effect on the render itself.
